

April, 2015

General Incorporated Association, Kyoto Breast Cancer Research Network (KBCRN)

Representative - Masakazu Toi

To Whom it may concern,

## Announcing change of company name

Wishing your company is prosperous at this sunny spring time. Thank you very much for your previous support of our organisation.

NPO Kyoto Breast Cancer Consensus Conference has now changed its official name as of this month. After the completion of the transition to a general incorporated association, we are going to dedicate ourselves to the promotion and permeation of breast cancer treatment, succeeding KBCCC's business purpose and business targets. We are also to contribute ourselves to cancer prevention and the enhancement of health.

Regarding the contractor name on various contracts and memorandums that have been agreed previously under the old corporation name; we ask that the name be transferred into the new name and we would like to omit any transition procedure. Please contact us at the below address should you have the need to go through any name change formalities.

For international conventions and regular meetings, the organisation will still be referred to as KBCCC.

We would like to ask for your continued kind and unchanging support.
